Dr. Jaewon Choi is an assistant professor of finance at the University of Illinois at Urbana-Champaign. Dr. Choi received his PhD from Stern School of Business, NYU, and holds a bachelor's degree from Seoul National University in Korea and a master's from Princeton University, USA.

He conducts research in the areas of empirical asset pricing, credit risk, and capital structure. His recent work focuses on how equity vs. debt choices interact with the risk and return dynamics of different asset classes. He has published in the *Review of Financial Studies* and the *Journal of Derivatives*. Prior to academia, he has worked in options trading and asset liability management desks in Deutsche Bank Asia.
